

## **Como Textured Melamine Panels.**

### **Regular Care and Handling**

Due to their resistant and hygienic surfaces, Como melamine-faced boards do not require any special maintenance. The surface is generally easy to clean.

The recommended cleaning methods according to the degree of soiling are as follows:

### **Light Soiling**

Clean with a paper towel, a soft clean cloth (dry/damp) or a sponge.

If using a damp cloth, dry the surface with an absorbent paper towel or microfibre cloth.

### **Avoiding Streaks**

Streaks often form when the surface is cleaned with organic solvents, together with cold water and old cloths. To ensure no streaks occur when cleaning, we recommend wiping the surface down with warm water and then drying it using normal paper towels or microfiber cloths.

### **Normal Soiling**

Clean with warm water, a clean rag or microfiber cloth, a soft sponge or soft brush. Use normal domestic cleaners or soaps that have no abrasive ingredients. Then wipe with fresh water, removing all traces of the cleaning agent, to prevent streaks forming. Dry the surface with a clean, absorbent cloth or paper towels. Avoid harsh household cleaners and abrasives. The following cleaning agents should not be used under any circumstances:

- Scouring and abrasive agents (abrasive powders, scouring pads, steel wool)
- Polish, washing powder, furniture cleaner, bleach
- Detergents with strong acids and acidic salts
- Steam cleaning equipment

Always check the active ingredients of your cleaners for potentially harmful chemicals. Do not use acetone, ammonia, amylacetate, benzene, butyl acetate, butyl alcohol, caustic soda, cellusolve, chlorinated solvents, chloroform, cresols/phenols, dichloromethane, ethylacetate, glacial acetate acid, halogenated solvents, methyl alcohol, methyl ethyl keytone, thinners, toluene, or xylene.

If chemical or staining liquids are spilled on the UV lacquered surface, wipe it off immediately and wash the surface with soapy water, rinsing several times to eliminate any residue.
